

## CREATIVITY BEYOND THE CONFINES (OF THE OPERATING THEATRE)

### Dr Roger Wandless

Southland Hospital,  
Invercargill

This talk is a personal story.

I have now self-published two photographic books and am just about to launch my latest and most ambitious publication yet, "Fiordland Landscape and Life."

I will catalogue my story so far, with reference to the influences, experiences and milestones that have led me to this point. We will go behind the scenes to show the making of some of the images as well, as sharing the planning, logistical and final arrangement of the images.

Self-publishing is not for the faint hearted and I will give some insights and share my experiences about this.

I will discuss what motivates me to make photographs and my evolving philosophy as an artist. Combining photography and anaesthesia has been a challenge but ultimately has enhanced my work life balance.

The talk will be punctuated with many images and anecdotes.

I hope that you enjoy it!
